THUMBIES[®]
FINGERPRINT KEEPSAKES

www.thumbies.com

The SIDS/Other Infant Death Network of Kentucky is proud to introduce you to Thumbies™ keepsake jewelry. They are individually created by casting your child's print into precious metals. Made by Meadow Hill, they are the ideal way to memorialize your child.

Those of us who have lost children know the value of memorials. Now, you can create a unique piece of jewelry made from your child's handprint or footprint. These prints are found right on your hospital/birth records. This piece will instantly become your most treasured possession.

I know from personal experience that when I lost my child, I desperately wanted to have a tangible remembrance of him. A Thumbies keepsake was the perfect solution. Take a minute to look at what they have to offer on their web site www.thumbies.com. I'm sure you will be amazed.
